PROFILE

Information Technology student with experience in back-end development using PHP and MySQL. Knowledgeable in system testing, PC troubleshooting, and creating API documentation that follows RESTful API standards using Postman and Swagger. Strong background in project management, team collaboration, and leadership. Also familiar with front-end technologies and version control tools like Git. Passionate about building reliable systems, solving technical challenges, and continuously learning to grow in the tech field.

WORK EXPERIENCE

Bapplware Technologies Inc.   2025
Business Analyst & Quality Assurance Tester Intern

- Created and maintained clear and structured API documentation following RESTful standards using Postman and Swagger.
- Conducted manual API testing, validating request/response data, authentication mechanisms, and endpoint functionality.
- Collaborated with QA testers and developers to analyze requirements, track bugs, and ensure system features met business needs.
- Logged issues and managed tasks in Trello, detailing reproduction steps, issue severity, and priority for efficient workflow.
- Participated in Agile sprints, contributing to sprint planning, daily stand-ups, and retrospectives to support iterative development.
- Maintained thorough documentation of testing processes and results, helping to identify areas for improvement and ensuring compliance with quality standards.
